ABOUT ME

I'm currently studying Backend Development at Noroff, and I have a background in frontend. I enjoy creating simple, clean and user-friendly solutions, and I'm always curious about new tools and technologies.

Outside of coding, I like gaming, football and golf. I enjoy being active, spending time with friends and family, and finding a good balance between tech and real-life activities.

TRUCK T1-4 & T8 LARGE TRUCK
HYDRO SUNNDAL

G4 OVERHEAD CRANE & G11 LIFTING EQUIPMENT / SLINGING COURSE

WORK EXPERIENCE

FRAKT24
Spain
Aug 2024 - Dec 2024

Student Internship

- Contributed mainly to the design of a new app in Figma, focusing on an intuitive and visually appealing user experience
- Gained practical experience with coding in Laravel and collaborating with a professional development team
- Used tools like GitHub for version control, Jira for task management, and HubSpot for tracking
- Actively participated in team meetings via Google Meet to ensure project alignment and delivery
- Supported daily operational tasks and administrative duties as needed
- Participated in project meetings and contributed ideas to ongoing initiatives

BILFINGER ENGINEERING & MAINTENANCE NORDICS AS
Norway
Sep 2013 - May 2023

Operator

Primarily seconded to Hydro Aluminium Sunndal.
At Bilfinger, I worked as a versatile maintenance operator, taking responsibility for everything from mechanical and construction tasks to process-related services, always with a clear focus on HSE. I performed repairs of floor and concrete damage in the basement, tore down old walls and built new ones in the carbon department, replaced oven cells in operations when needed, and operated an overhead crane to transport very heavy lifts safely and precisely. The work required careful handling of job permit systems, frequent safe job analyses (SJA), and close coordination (synergy) with the operations team to ensure safe and efficient work processes.

HYDRO ALUMINIUM SUNNDAL
Norway
Jun 2010 - Aug 2013

Summer Substitute

For three consecutive summers, I returned to Hydro Aluminium Sunndal as a temporary worker.
As a summer substitute operator in the press bolt department at the foundry, I was responsible for the entire workflow of aluminum bolts. I received and registered production orders in the data system, started the automated saw line, and monitored parameters along the way to ensure smooth production. After sawing, I placed the bolts on loading trays, drove them with a terminal tractor to the storage area, and unloaded them with a large truck. Throughout the shift, I worked according to strict HSE routines, performed safe job analyses, and followed up on work permits to ensure a safe and efficient work environment.

HYDRO ALUMINIUM SUNNDAL
Norway
Sep 2007 - Sep 2009

Apprentice

During my apprenticeship at Hydro Aluminium Sunndal, I worked extensively in teams. This role emphasized collaboration and teamwork to ensure efficient production processes and maintain high safety standards.

EDUCATION

NOROFF SCHOOL OF TECHNOLOGY AND DIGITAL MEDIA
Norway 2025

Backend Development

Expanding my technical skills by studying backend development, aiming to enhance my understanding of server-side technologies and database management to complement my expertise in front-end.

NOROFF SCHOOL OF TECHNOLOGY AND DIGITAL MEDIA
Norway 2024

Front-End Development

• Have two years of focused experience in front-end development, with thorough knowledge of HTML, CSS, and JavaScript
• Used design tools like Adobe XD and Figma to create user interfaces.
• Completed several projects to apply theoretical knowledge in practice.
• Developed expertise in advanced technologies such as React, TypeScript, and CSS frameworks like Bootstrap and Tailwind.
• Experience in building advanced web applications that enhance my skills in coding and design.
